ABOUT ME

Junior Backend Developer with a solid foundation in web development and object-oriented programming, specializing in the **LAMP stack (Linux, Apache, MySQL, PHP)**. After earning my diploma in Computer Science from **ITIS Galileo Galilei** in Rome, I independently expanded my expertise in technologies and tools such as **Git, REST APIs, WebSockets, and Design Patterns**, developing personal projects including **ChessNova**, an online chess platform featuring user authentication and a well-structured backend architecture.

Since 2026, I have been working as a **Freelance Backend Developer**, undertaking projects assigned by an IT consulting firm involving the development, migration, and maintenance of **Moodle** learning platforms. My responsibilities include developing custom plugins, debugging, performance optimization, and maintaining applications based on the **LAMP architecture**.

SKILLS

BACKEND

PHP | OOP | MVC | API REST | Design pattern | Web Sockets

DATABASE

SQL | MySQL | Relational Database Design and Management

WEB & SERVER

LAMP Stack | Linux | Apache

MOODLE

Plugin Development | Platform Migration and Maintenance

VERSION CONTROL

Git | GitHub

FRONTEND

JavaScript | CSS | HTML

SOFT SKILLS

Problem solving | Self-Learning | Team work | Adaptability

EDUCATION AND TRAINING

08/09/2020 – 30/06/2025 Rome, Italy

High School Diploma in Computer Science ITIS Galileo Galilei

Website www.itisgalilei.edu.it | **Final grade** 87/100: 20/20 Computer Science, 14/20 Italian

WORK EXPERIENCE

Freelance Roma, Italy

Web developer

07/05/2026 – Current

- Migration and upgrade of Moodle LMS platforms
- Custom plugin development
- Debugging and testing
- Technologies used:
 - LAMP Stack

PROJECTS

15/07/2026 – 18/07/2026

Portfolio

Personal portfolio developed to showcase my professional profile, technical skills, and completed projects. The website was built using **PHP, HTML, CSS, and JavaScript**, with multilingual support (**Italian/English**).

10/05/2026 – 16/06/2026

Chessnova

ChessNova is an online chess platform developed from scratch using the **LAMP stack (Linux, Apache, MySQL, PHP)**. The project includes a complete user authentication and management system, game creation and management, matchmaking, real-time move updates through **WebSockets**, and a backend designed with a modular architecture based on the **MVC pattern** and object-oriented programming principles. The application uses **REST APIs** for client-server communication and a **MySQL database** designed to ensure data integrity and scalability.
